

SOUNDTANK

Ibanez

AC ADAPTER JACK

Connects the optional AC109 AC adapter. Plugging into this jack automatically disconnects the internal battery and the unit works by the AC adapter only.

INPUT JACK

Connects a guitar. Plugging into this jack automatically puts power to the unit (battery is on).

OUTPUT JACK

Connects an amp or the input of another effect device.

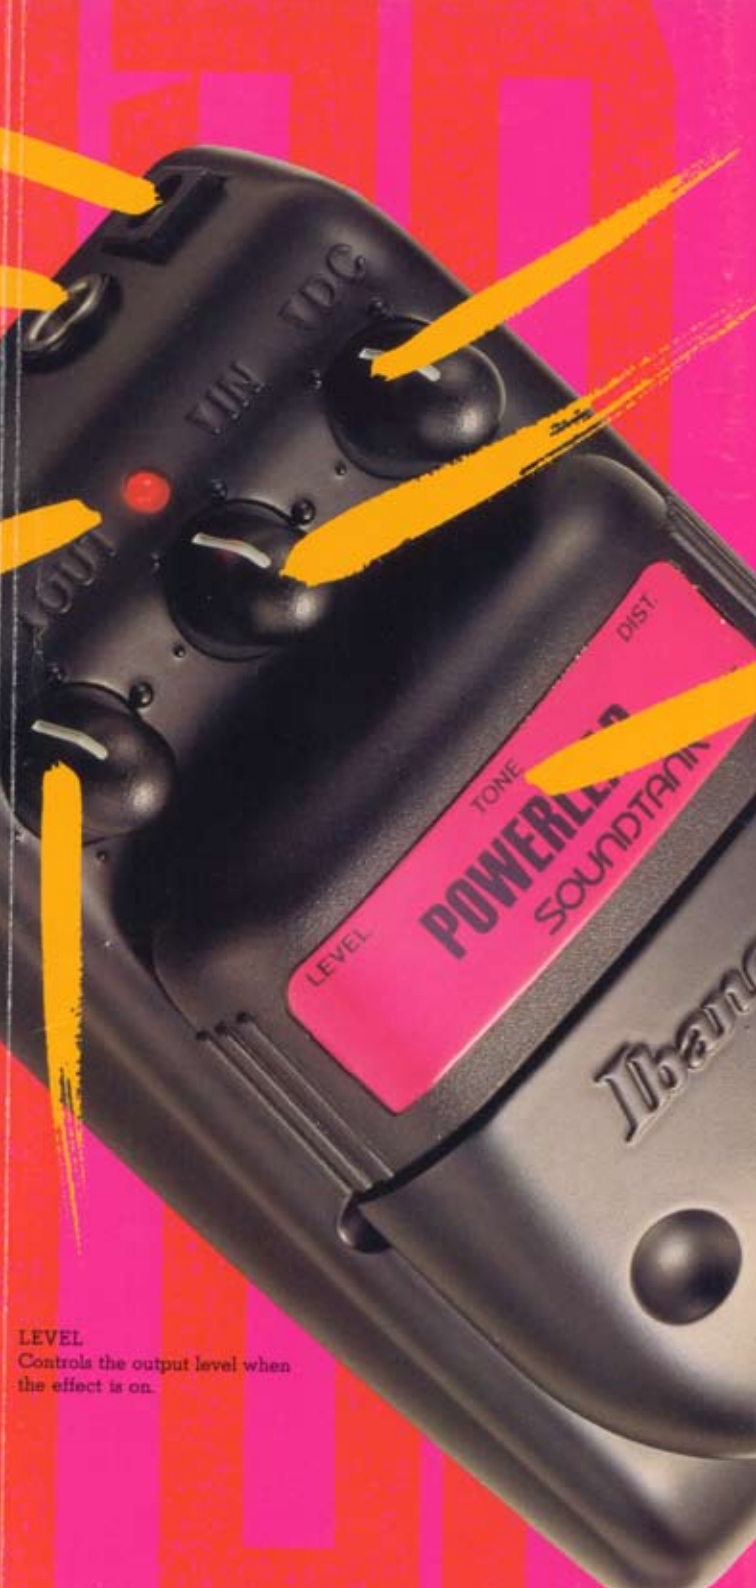

LED INDICATOR

Lights when the effect is on. If this LED is dim or does not light, replace the battery.

Make great sounds with this stunning range of distortion units!

In the past, you had to look around for the effect which suited your style of music. Each effect had its own character, and none was what you were after. Now things are different, with the introduction of 6 models in the IBANEZ SOUNDTANK range. Each unit reproduces a different style of distortion, but is still flexible enough for you to add your own individuality to the sound.

Get playing today with an IBANEZ SOUNDTANK - the way you've always wanted to sound!

LEVEL

Controls the output level when the effect is on.

DISTORTION

Controls the distortion depth. Turning this control to the right increases both distortion and sustain.

tone

Turning this control to the left produces a more bassy tone, and turning it to the right produces a more trebly, cutting tone.

BATTERY COVER

To replace the battery, push in both sides of the battery cover and lift it off the main unit. Replace the battery with a new one, and replace the cover.

UNIQUE CL
DESIGN!
The IBANEZ
series has a simpl
design. This makes
in rehearsals and on st
simpler and easier.

FOOTSWITCH

Alternately turns the effect on or off each time it is depressed.

EASY BATTERY REPLACEMENT!
On the IBANEZ SOUNDTANK series, replacing the battery is easy - just press the sides of the battery cover, and lift it up.

TYPE

MAKE
THE BREAK!

POWERLEAD
SOUNDTANK

PL5

For those lightning-fast lead breaks, with the punchy distortion sound to get through, but with the subtlety to get every note across, no matter how fast you play. The sustain you get from the IBANEZ PL5 makes you and your guitar into the perfect team, capable of playing everything your imagination can devise.

THE
BOTTOM
LINE

C CLASSICMETAL
SOUNDTANK

CM5

British hard rock in the '70s gave the world a new guitar sound-based on high-power stacks. This unit's low-end power helps you to re-create that classic sound which has influenced so many players of today. With the IBANEZ CM5, you could end up influencing the next generation!

**WILD
AND
WICKED**

THRASHMETAL
SOUNDTANK

TM5

Designed to enhance the feel of modern high-speed driving '80s heavy metal playing. The penetrating aggressive treble tone cuts through walls of sound like a knife, getting your sound right through to your audience. Let the IBANEZ TM5 make your day!

BREAK
ON
THROUGH

CRUNCHYRHYTHM
SOUNDTANK

CR5

Without the solid backing of a rhythm guitar, the sound of the band falls to pieces. Most distortion units have been designed for lead players only - but no more! This unit gives you, the rhythm guitarist, control over the clear responsive sound to keep you driving along. Don't even think of playing another rhythm part without the IBANEZ CR5!

GET THE
EXPERIENCE!

60'SFUZZ

SOUNDTANK

SF5

Compact effects units really started to come into their own in the '60s. With a single-coil pickup guitar, this unit gives you a re-creation of that chapter of history. We can't promise you Jimi Hendrix' genius, but we can give you his sound with the IBANEZ SF5. Who knows, you might discover that you have his genius as well!

FEELING AND
FINESSE

MODERNFUSION
SOUNDTANK

MF5

In the jazz/fusion field, each guitarist has his own individual style, talking to the audience through the sound of his guitar. Earlier softer distortion units haven't really helped you to do this. Now the IBANEZ MF5 helps you achieve that style, with a sweeter distortion sound to help bring your music to your audience.
